Appendix	16
Changelog 1.1	16

Section 1 Set-up

Section 1.1 Board Set-up

1. Place map board on the center
2. Place round counter above the map board
3. Place the encounter card beside the round counter
4. Place action point counter for each player
5. Place lamis counter for each faction
6. Place the wall onto the allocated slots on the map board

Section 1.2 Player Set-up

1. Each player picks their respective battlesuit operative sheet (**refer to section 2.1**)
 - a. No two players within the same faction may have the same battlesuit
2. Select an Arms Augment each for their respective operative (**refer to section 2.1**)
 - a. No two players within the same faction may have the same Arms Augment
3. Update the operative sheet accordingly

Section 1.3 Game Set-up

1. Each player rolls a D6 to decide their turn order
 - a. should two or more players have the same result a reroll between the parties in question will occur
2. Players may decide their individual factions
 - a. Factions must have the same number of people
3. Each player places their operative tokens onto their respective spawn points on the board

Section 1.4 Gameplay

1. Action Points are allocated at the start of the player's turn (**refer to section 4.1**)
2. Increment the action point counter accordingly
3. A player ends their turn when they have spent all their action points or decided to skip their turn, the turn will be passed to the next player based on the turn order
4. After every player finishes their turn, increment the round counter to indicate the next round
5. Increment the lamis counter accordingly (**refer to section 5.1**)
6. Check if there is any encounter occurring (**refer to daybreak scenario**)
7. If no encounter repeat step 1

Section 2 Customization

Players will split themselves into 2 factions and discuss within themselves which of the 6 battlesuits to pick without the other faction knowing as well. After selecting their desired battlesuits, players of the same faction will have to discuss amongst themselves on the 6 different arms augment types to equip on their battlesuits. Similar to the battlesuits, there should not be more than one arms augment of the same type equipped on the battlesuits of the same faction.

Section 2.1 Unit Types

There are 6 unit types within the game consisting of Factions, Battle Suits, Arm Augments, Body Augments and Consumables.

Unit Type	Description	Availability	Acquisition
Factions	Factions provide the players characteristic and goals within the game	Player will discuss amongst themselves and split even between 2 factions	Players choose which faction they want at the start of the game
Battle Suits	The primary unit type within the game, determines player's role in combat	There should not be more than one battlesuit of the same type in a faction.	Players choose which Battle Suits they want at the start of the game
Arm Augments	A secondary unit type, determines the player's modifier, damage type and range	There should not be more than one arms augment of the same type equipped on the battlesuits of the same faction.	Players will choose which arms augments they want at the start of the game.
Body Augments	A secondary unit type, determines the player's modifiers and passives	There should not be more than one body augment of the same type equipped on the battlesuits of the same faction.	Players will choose which body augments they want at the start of the game
Consumables	A secondary unit type, provides players with additional options within the game	Players may obtain as much as they are able.	Players may purchase consumables in the item shop

Section 2.2 Character Sheet

Battlesuit:

Main Stats			Derived Stats		
Stats	Base	Modifier	Stats	Base	Modifier
Strength			Armour[(Str + End) * 2]		
Dexterity			Movement (Agi / 3)		
Endurance			Accuracy [(Dex + Foc) / 3]		
Agility			Mentality (Foc / 2)		
Focus			Hit Point (Willpower * 5)		
Willpower					

Abilities
<u>Weapon Attack</u> Base Damage: X number of D6 (X is based on Arms Augment Rarity) + Weapon Damage AP Cost: 1 AP Cooldown: Nil
<u>Special:</u> Effect: Damage: Range: AP Cost: 1 AP Cooldown: 1 Turn
<u>Ultimate:</u> Effect: Damage: Range: AP Cost: 2 AP Cooldown: 2 Turn

Section 3 Stats

Section 3.1 Primary Stats

Stats	Description
Strength	Determines how physically capable the character is
Dexterity	Determines the character's reaction speed and their ability to handle complex mechanism
Endurance	Determines the character's stamina and durability
Agility	Determines the character's speed
Focus	Determines the character's mental acuity
Willpower	Determines a character's will to live

Section 3.2 Secondary Stats

Secondary Stats	Calculation	Description
Armor	$(\text{Strength} + \text{Endurance}) * 2$	Affects a character's defensive power (functions as a second health bar)
Movement	$\text{Agility} / 3$	Affects how many tiles a character can move
Accuracy	$(\text{Dexterity} + \text{Focus}) / 3$	Affects accuracy of attacks and skills
Mentality	$\text{Focus} / 2$	Affects the power of certain skills
Hit Points	$\text{Willpower} * 5$	Affects a character's total health pool

Section 4 Combat Resolution System

Section 4.1 Action Point System

Acquisition:

For 1v1: Each player has a total of 10 action points each turn to control their operatives.

For 2v2: Each player has a total of 7 action points each turn to control their operatives.

Usage:

The player is able to consume action points to either move or attack. Action points are fully replenished at the start of each turn.

Section 4.2 Combat System

Section 4.2.1 Abilities

Players are able to use any of the 3 abilities at their disposal as long as they have enough action points and/or ammo, this consists of weapon attacks, specials and ultimates.

	Action Point Cost	Ammo Cost
Weapon Attack	1	1
Special Attack	1	0
Ultimate Attack	2	0

Each operative will have one arm augments (weapon) which determines their attack damage, and attack range. Specials and Ultimates are determined by the player's battlesuit.

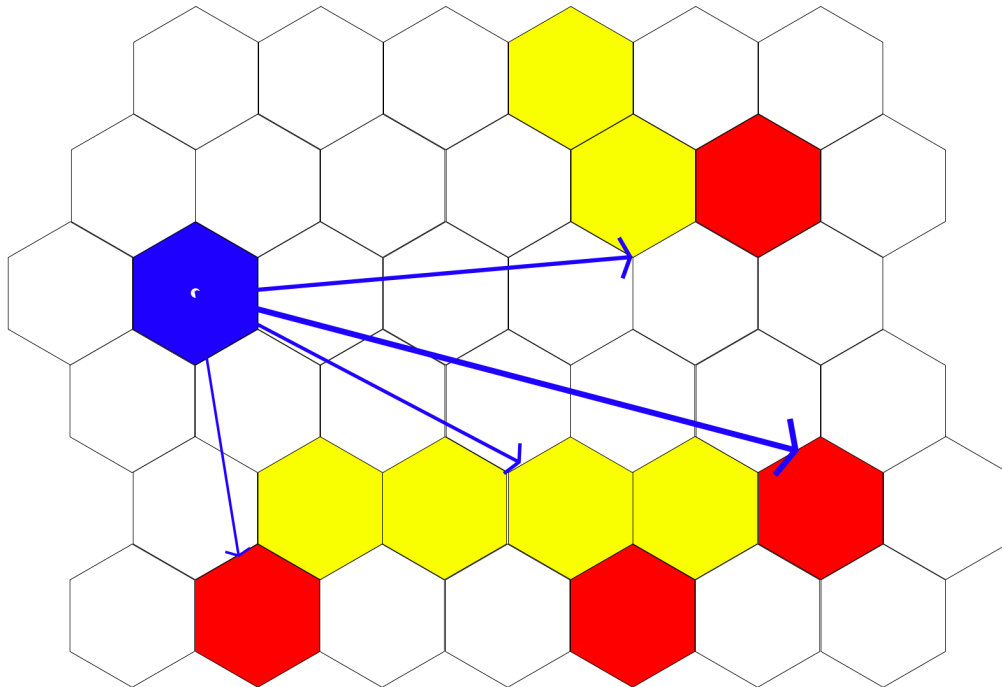

Section 4.2.2 Accuracy

When the player attacks, both the player and the targeted player have to roll to determine whether the attack succeeds. The attacking player's accuracy stat + d4 has to be greater than the targeted player's d8 roll to hit.

Attack Accuracy = (Accuracy Stat(Attacking Player) + D4) + Line of Sight Modifier(Attacking Player) > D8(Targeted Player) + Line of Sight Modifier(Targeted Player)

Section 4.2.3 Line of Sight

Operatives have to make sure that their targets are within their line of sight in order to target them either with their attacks or their item

Certain terrain obstacles block line of sight either completely or partially (See section 5.3: Obstacles for more details).

Section 4.2.3.1 Line of Sight Modifier (LoS Mod)

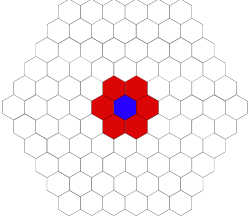

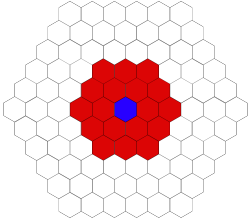

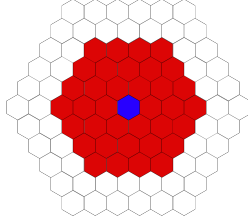

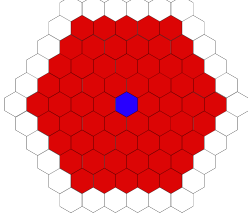

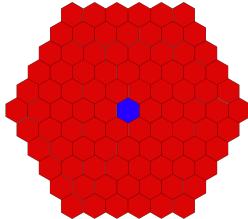

The Line of Sight Modifier affects an attacking player's accuracy and a targeted player's evasion. There is a complete LoS Mod and a partial LoS Mod. A complete LoS Mod comes into play when the line of sight between the attacker and the target is completely blocked. In this situation, LoS Mod for attackers is equal to the negative of the attacker's accuracy + d4.

$$\text{Line of Sight Modifier} = \text{Accuracy Stat (Attacking Player)} + D4$$

Partial LoS Mod occurs when the attacker's line of sight is partially blocked (e.g. target is on a smoke tile). In this situation, the LoS Mod value depends on the effects of the obstacle itself (refer section 5.3: Obstacles for more details).

Section 4.2.3.2 Range

Range is defined as the area that an attack, or item can hit. Below are the various terms that are used in the rulebook, and unit catalogue regarding range and the visual representation of said range.

Range	Visuals
1 tile radius / adjacent tile	
2 tile radius	
3 tile radius	
4 tile radius	
5 tile radius	

Section 4.2.4 Damage

Once the attacker passed the accuracy check, the player can now calculate the amount of damage dealt. This is done by taking the operative arms augment's base damage + dice modifier. The number of dice that can be rolled is determined by the rarity of the arms augment (**refer to section 4.3.4: Weapon Rarity & Dice Modifier for more information**).

$$\text{Damage Dealt} = \text{Arms Augment Damage(Attacking Player)} + \text{Arms Augment Rarity Modifier}$$

Section 4.2.5 Weapon Rarity & Dice Modifier

A weapon's rarity determines the number of dice a player can roll to determine that weapon's damage modifier on each attack.

Weapon Rarity	Number of Dice
1-star	1
2-star	2
3-star	3

Every time a player declares an attack for an operative roll the number of dice corresponding to that operative's weapon rarity and add that result to the base weapon damage of the weapon.

Dice Result	Modifier
1	+1
2	+2
3	+3
4	+4
5	+5
6	+6

Take note that if duplicate results are rolled, only one of them will be added to the base weapon damage. For example, 3 dice are rolled, which results in two 5s and one 2. The total modifier added to the weapon's base damage is 7.

Section 4.2.6 Defense

Armour is a bonus hit point for each operative, the difference between armour and hit point is that armour is unable to be recovered once it is damaged or removed.

If there is still remaining Armor on the enemy's operative, any damage taken by that operative will be deducted from the Armor first.

If the remaining Armor is at 0, the enemy will take damage directly to their health.

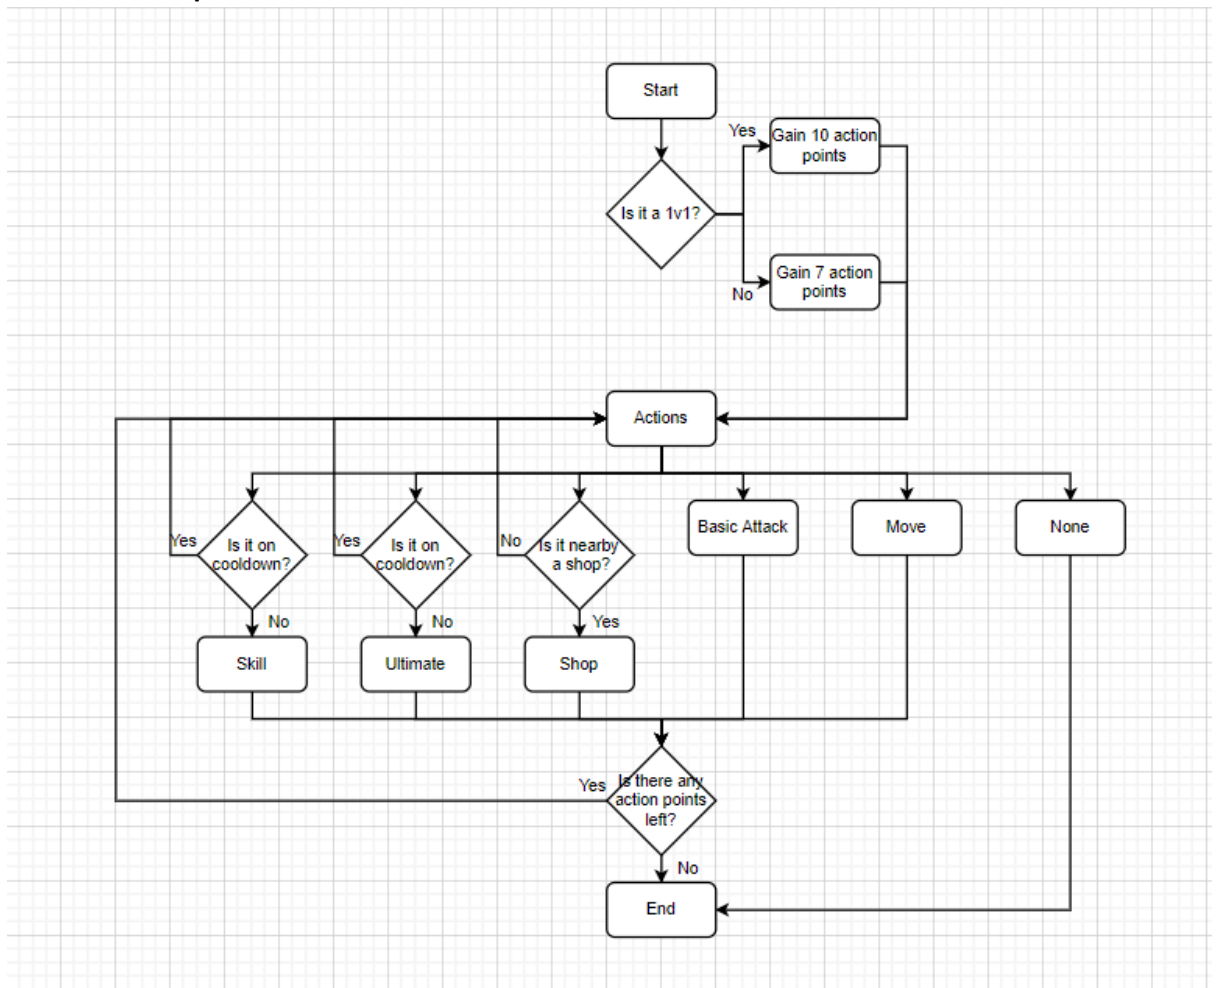

Section 4.3 Consumables

Consumables may be bought from the item store with lamis, and used during the combat scenario for 1 action point given the item usage constraint specified in the description.

Below is a table specifying the usage of each consumable:

Consumable	Range	Effect
EMP	Applicable Target: Enemy operative or constructs Target Range: Within 3 tiles Area of Effect: Single Target	Target cannot use Special and Ultimate skills for a turn. If this is applied onto a turret, the turret will be stunned for a turn.
First-Aid Kit	Applicable Target: Ally operative or self Target Range: Within 2 tiles Area of Effect: Single Target	Target is healed for 10 health points.
Reinforce Wall	Applicable Target: Single 'Wall' type obstacle Target Range: Adjacent tile Area of Effect: Single Target	An additional layer of durability of 10 points will be applied onto the target
Smoke Launcher	Applicable Target: Open tiles Target Range: Within 3 tiles Area of Effect: Upon landing, 1 tile radius	Operatives standing on the smoke tiles will have a line of sight modifier of -2 (attacking and being targeted)
Biometric Scanner	Applicable Target: Enemy operative Target Range: Within 3 tiles Area of Effect: Single Target	Scanned targets will be more vulnerable to damage. (Attackers will roll a d8 in damage calculation instead of a d4 - Limited to weapon attacks)
Armour Plate	Applicable Target: Ally operative or self Target Range: Within 2 tiles Area of Effect: Single Target	Target will gain an additional 10 armor durability
Drone	Applicable Target: Enemy Operative Target Range: Within 2 tiles Area of Effect: Single Target	Send a Drone out. Additional Note: Only 1 drone at a time for each faction can be used. Drones can stun an operative, disabling the operative's special and ultimate skill for a turn. After stunning an operative, it will be destroyed. Enemies can destroy the drone as well.

Section 4.4 Combat Loop

Section 5 Movement System

Section 5.1 Movement Cost

Movement within the game costs 1 Action Point, with a player's movement stat determining the number of tiles they are allowed to move per Action Point.

Section 5.2 Terrain

Terrains are the tiles that exist on the map reflecting the battlefield. On certain tiles there will be obstacles blocking or hindering operative's actions. These obstacles affect the tiles they are on in different ways and these effects extend to the operatives as well.

Section 5.3 Obstacles

Obstacles exert a variety of effects below is a table depicting those effects.

Obstacles	Description
Plain	NIL
Yellow (Low wall)	Operatives are unable to move through or target operatives across these tiles. Line of Sight Modifier (Attacking Player) = - (Attacking Player's Accuracy) Durability = 13 health points
Orange (Mid Wall)	Operatives are unable to move through or target operatives across these tiles. Line of Sight Modifier (Attacking Player) = - (Attacking Player's Accuracy) Durability = 20 health points
Aqua (Barbed wire)	Moving operatives through this tile will require 2 action points instead of 1
Gray (Smoke)	Line of sight modifier (Attacking Player & Targeted Player) = -2 Affected tiles lasts for 2 turns
Blue (Engineer's Portable Wall)	Operatives are unable to move through or target operatives across these tiles Line of Sight Modifier (Attacking Player) = - (Attacking Player's Accuracy) Durability = Operative's Mentality * 4
Blue (Engineer's Turret)	Operatives are unable to move through or target operatives across these tiles Line of Sight Modifier (Attacking Player) = - (Attacking Player's Accuracy) Durability = Operative's Mentality * 4 Damage = Operative's Arms Augment Damage Stat

Additional Note
1. Constitution reduction does not apply in damage calculation against obstacles. 2. All attacks against obstacles are guaranteed to hit. 3. There are no additional modifiers for Turret's damage

Section 6 Currency

Lamis, is the currency of Daybreak City, named after its creator, Lamis Chan in the year 2078. The currency is being produced and regulated by the Eclipse Corporation.

Section 6.1 Acquisition

	Acquisition
Pre-Game	At the start of every scenario, both factions will receive 10 lamis to purchase consumables
Mid-Game	Factions will gain 5 lamis for each opposition operative they manage to eliminate. Factions will also gain 2 lamis every turn.
Post-Game	The total lamis from the current scenario will be carried over to the next.

Section 6.2 Arms Augment Rarity Upgrade

Upgrading weapons can be done in the item shop located somewhere on the map. Upgrading a weapon from 1-star to 2-star rarity costs 2 lamis, and upgrading it from 2-star to 3-star rarity costs 3 lamis.

Note: Only the character that interacts with the item shop will have their weapon upgraded.

Rarity Upgrade	Cost
1-star to 2-star	2 lamis
2-star to 3-star	3 lamis

Section 6.3 Item Shop

Lamis can be spent in the item shop to purchase consumables that will provide support in combat. In addition to this, it is also possible to upgrade an operative's arms augment through the item shop. The item shop can be accessed before the scenario starts and during the scenario itself (through the item shop specified on the game map).

Note: Arms Augment Upgrade services are only provided by the item shop found on the game map while the scenario is underway.

Cost	Consumable Type	Description
3 lamis	EMP	Applicable Target: Single enemy operative or constructs, within 3 tiles. Effect: Target cannot use Special and Ultimate skills for a turn. If this is applied onto a turret, the turret will be stunted for a turn. Purchase Limit: 2 per scenario.
2 lamis	First-Aid Kit	Applicable Target: Single ally operative or self, within 2 tiles Effect: Target is healed for a certain health point: 10hp. Purchase Limit: 3 per scenario
2 lamis	Reinforce Wall	Applicable Target: Single 'Wall' type obstacle, on adjacent tile Effect: Additional layer of durability of 10 points has been applied onto a tile with an obstacle that is destructible. Purchase Limit: 3 per scenario
3 lamis	Smoke Launcher	Applicable Target: Open tiles, within 3 tiles, upon landing, effect spreads to a 1 tile radius. Effect: Operatives standing on the smoke tiles will have a line of sight modifier of -2 (attacking and being targeted) Purchase Limit: 2 per scenario
2 lamis	Biometric Scanner	Applicable Target: Single enemy operative, within 3 tiles Effect: Scanned targets will be more vulnerable to damage. (Attackers will roll a d8 in damage calculation instead of a d4 - Limited to normal attacks) Purchase Limit: 3 per scenario
2 lamis	Armour Plate	Applicable Target: Single ally operative or self, within 2 tiles. Effect: Target will gain an additional 10 armor durability Purchase Limit: 4 per scenario
4 lamis	Drone	Applicable Target: Single enemy operative, within 3 tiles Effect: Send a Drone out. Additional Note: Only 1 drone at a time for each faction can be used. Drones can stun an operative, disabling the operative's special and ultimate skill for a turn. After stunning an operative, it will be destroyed. Enemies can destroy the drone as well. Purchase Limit: 1 per scenario.

Appendix

Changelog 1.1

- Updated format for rulebook for increased clarity
- Removed Introduction section
- Added Set up section
 - Added board setup
 - Added player setup
 - Added game setup and gameplay
- Added Customization section
 - Added character sheet
 - Moved unit types under this section
- Action System changed to Combat resolution system
 - Defined action point acquisition and usage in action point system section
 - Abilities, Accuracy, Damage Modifier and Armor added into Combat system section
 - Previously mentioned sections given explicit equations for better readability and clarification
 - Added Consumables
- Added Movement System
 - Defined movement costs
 - Added introduction to the various terrain on the game map
 - Added a table overview of all obstacles in the game
- Added Currency
 - Added Acquisition section of currency
 - Added Arm Augment Rarity upgrade section
 - Added Item shop

Changelog 1.2

- Added Line of Sight section under Combat resolution system
 - Added a diagram to better depict line of sight
 - Added a line of sight modifier sub-section that explains how the modifier work in accuracy calculation
 - Added a range sub-section that contains a table with visual representation of each range terms used
- Updated consumables section under Combat resolution system
 - Added a table that describes how-to-use each consumables
- Updated the obstacles section
 - Updated the obstacle table
